

Simplified blood glucose monitoring.

Easy. Reliable. Accurate.

iPet PRO is a blood glucose reading device designed specifically for use in dogs and cats. If your pet has been diagnosed with diabetes, your veterinarian may recommend testing your pet's blood sugar. iPet PRO accurately measures blood samples and features an easy-to-use system, a large LCD screen, and a memory which stores up to 500 test results. It also has a clock and alarm feature which allows you to set reminders when it's time to test. Talk with your veterinarian before testing at home and follow their specific instructions.

A Complete Solution.

The iPet PRO Complete Glucose Monitoring Kit includes everything you need to begin at-home monitoring with your pet:

- Blood glucose meter
- 25 test strips
- Glucose chip
- Lancing device
- 28-gauge lancets
- Control solution
- Carrying case
- User guide and logbook
